

SLOPE HUD. ROLE OF THE DISPLAYS.

GOAL sHUD

1. Maximize the 3D experience through depth effect
2. Combining Navigation and ADAS information in one integrative view
3. Valuable extension of the pHUD

SLOPE HUD. CONCEPT IDEA.

- **Abstract visualization of the current driving situation** (road geometry) including ADAS state(s) and navigation information
- **Static dock display** shows important driving information (e.g. current speed, set speed, speed limit, lane guiding, etc.)
- **Different camera perspectives** (zoom-in / zoom-out) change the view on the scene according to the driving situation
- **The Iconic Element** represents the ego position of the vehicle
