CID

»»» Guiding »»»

The **Pop-Up in the CID** shows **guiding information**, which appears when approaching a navigation maneuver and disappears after.

Prerequisites:

- Active navigation guiding
- Map-View selected in CID
- CID selected as display location of Pop-Up

Instrument Cluster

»»» Guiding as Pop-Up »»»

The **Pop-Up in the IC** shows **guiding information**, which appears when approaching a navigation maneuver and disappears after.

Prerequisites:

- Active navigation guiding
- Map or road book widget selected in IC
- IC selected as display location of Pop-Up

»»» Guiding and FAS as widget

The **AR Widget in the IC** shows **guiding and ADAS information** and can be selected permanently.

Prerequisites:

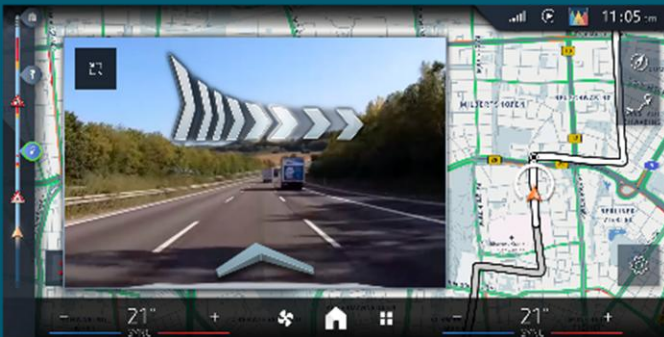

- SA 5AT or higher
- Enabled in IC settings
- AR Widget activated in IC settings

CID

»» Guiding »»

The **Pop-Up in the CID** shows **guiding information** and appears when approaching a navigation maneuver and disappears after.

Prerequisite:

- Active navigation guiding
- Active Augmented View
- Map-View selected in CID

CDD

»» Guiding & FAS »»

The **Pop-Up in the CDD** shows **guiding information** and appears when approaching a navigation maneuver and disappears after. Additionally, VAR will show **driving assistance content** like ACC, LSA etc.

Prerequisite:

- Active navigation guiding
- Active Augmented View
- Map-View selected in CDD

CID/CDD

»» PiP »»

Guiding pop-ups

- Guiding has to be active
- Customer can manually switch to PiP-Mode

Always-on

- If Guiding = active; VAR pop-up will change to Full-Mode little before a maneuver and switch to PiP after
- Due to “always_on” VAR can be shown without an active guidance, and visualize FAS
